

**INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY JUNE 4, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was light nationally with 130 new fires reported. Two new large fires were reported in the Southwest. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, New Mexico, Oklahoma, Texas and Utah.

ALASKA AREA LARGE FIRES:

TOK RIVER, State of Alaska. A Type 2 Incident Management Team (Reed) is assigned. The fire is burning in black spruce, tundra and mixed hardwoods, five miles southeast of Tok, AK. Minimal fire activity was observed yesterday, with creeping and smoldering in tundra, and some interior torching. Line construction and mopup continues today, and structure protection remains in place.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
TOK RIVER	AK	AKS	6,143	45	6/10	481	16	15	5	0	1.6M

NORTHERN CALIFORNIA AREA LARGE FIRES:

LUHI, Hawaii Volcanoes National Park. This fire was started by lava from the Kilauea Volcano. The fire is burning in grass, brush and rainforest on the Island of Hawaii. Crews are mopping up hotspots along the perimeter.

LUHI	HI	HVP	4,980	75	6/6	79	3	0	3	0	NR

SOUTHWEST AREA LARGE FIRES:

DRY LAKES COMPLEX, Gila National Forest. A Fire Use Management Team (Rath) is assigned. This lightning caused Wildland Fire Use fire is 27 miles northwest of Silver City, NM and is being managed to accomplish resource objectives. The fire is burning in pinyon and ponderosa pine, brush and juniper. Active fire behavior was observed yesterday, and continued monitoring is planned for today.

APACHE, Santa Fe National Forest. This fire is burning in pinyon and ponderosa pine approximately three miles west of Barillas Peak, NM. Minimal fire activity was observed yesterday with isolated torching. Resources will continue to monitor fire and control lines today.

APACHE	NM	SNF	120	30	UNK	42	2	3	0	0	8K

OUTLOOK:

Weather Discussion: Across the western third of the United States, high pressure is in control keeping conditions dry and warm. Breezy conditions will be in place today across northeast Montana as a storm system drops into the Plains from Alberta. In the central and southeastern states, low pressure will produce showers and thunderstorms in the Plains and around northern Florida. In Alaska, low pressure in the northern Pacific will cause showers along the southern coast, but interior sections will remain dry.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
ALASKA AREA South central partly cloudy. Central Interior mostly sunny with a chance of PM showers in the east. Southwest partly cloudy.	55 to 70 55 to 70, mid-60's most common 55 to 65	30% to 45% 20% to 40%, driest in SW Interior 30% to 38%	Southeast 5 to 20 mph Southwest to west 15 mph East to northeast 15 to 30 mph
ROCKY MOUNTAIN AREA Isolated to widely scattered afternoon thunderstorms east of the divide. Partly sunny.	65-75 except 80s in the west.	15%-20% west, with 25%-40% east.	Mainly variable at 5-15 mph.
SOUTHERN CALIFORNIA AREA Morning low clouds and fog into the coastal valleys, otherwise mostly sunny, except becoming partly cloudy over the Sierras with a slight chance of thunderstorms east of the crest.	75-90 Mountains and Coastal Valleys, 90-102 Inland Valleys and Upper Deserts, 100-110 Lower Deserts	15-30% Mountains and Inland Valleys, 40-55% Coastal Valleys, 5-15% Deserts	SW-NW 5-15 mph.
SOUTHWEST Partly to mostly sunny. Scattered thunderstorms eastern NM, western TX. Isolated thunderstorms over NM mountains.	70s and 80s mountains, 80s and 90s lower elevations, 90s to 105 in the AZ deserts.	15-30% eastern NM and west TX, 8-28% elsewhere.	SW 10-15 mph over southwest AZ, W 10-20 mph over central and northern AZ and NM, SE to NE 5-15 mph over eastern NM and west TX.
NORTHERN CALIFORNIA AREA Clear skies inland, with areas of fog or low clouds along the coast.	60s and 70s near the coast and upper 80s to 104 inland	10 to 20% drier inland areas.	NE to SE 7-17 mph morning winds near the Cascade/ Sierras, with local gusts low 20s down the west slopes. Otherwise winds variable under 12 mph.

UNINFORMED ON STRATEGY, TACTICS OR HAZARDS

Firefighters who are uninformed on strategy, tactics or hazards are violating Watchout Situation #5. Before going to the fireline, it is imperative that firefighters obtain information about strategies, tactics or hazards by asking themselves the following questions:

- Can communications be established to find out strategy, tactics or hazards? Discuss ways you might establish communications; for example, contacting someone who is already on the fire and asking them what tactics and strategies are working or not working, what hazards they have witnessed, etc.
- Can scouting safely identify potential hazards? Talk about different methods of scouting a fire (e.g., using a lookout from your crew or sending a line scout ahead, utilizing air attack or the spotter on a smokejumper airplane). Discuss what types of hazards you might come across and ways you would mitigate them. For example, arriving at a fire after dark and a being instructed to dig line downhill with the fire below. How could you make this a safe situation?
- Have strategy, tactics or hazards changed since last informed? Discuss situations that might alter the way you are fighting a fire (e.g., wind shifts, resources you expected don't arrive, etc.). Also, think about what new hazards can develop while you are on the fireline (e.g., roots burning out and trees coming down, winds shifting direction and speed, etc.)
- Can you get a briefing from your supervisor? Talk about the importance of constant communications and ensuring firefighters are on the same page with strategies and tactics. For example, if one crew decides to do a burnout, but doesn't let the crew at the other end of the line know what they are doing, then what can happen?
- To reduce the risks:
 - Post lookouts.
 - Determine escape routes and establish safety zones.
 - Consider retreating until you are informed.
 - Don't leave a staging area or operational briefing until you have all the pertinent information. Emphasize ways to inform firefighters about strategies, tactics and hazards. Tell a story about when you were uninformed and what you did to correct the situation so that you were safe.
